Empowering Women in STEM
Faculty Panel

Tuesday,
Apr 21 6pm, Shaffer 100

Overcoming Bias & Barriers to Achieve Gender Equity in Science

Panel Speakers:
Trina Schroer, Professor, JHU KSAS Dept. Biology
Dorothy Beckett, Professor, University of Maryland Dept. Chemistry
Jie Xiao, Assoc. Professor, JHMI Dept. Biophysics & Biophysical Chemistry
Lori Graham-Brady, Professor, JHU WSE Dept. Civil Engineering
Christine Newman, Asst. Dean for Engineering Education, JHU WSE

Questions? Check the website or email Karen.Fleming@jhu.edu

Who should come?
Everyone is welcome, including faculty, academic staff, post-docs, research assistants and graduate students. All genders are welcome. Come if you are a woman or know a woman or have a daughter or a wife that could be affected by the the unconscious barriers that affect women in STEM. Come if you are a man and want to advocate for gender equity in STEM. The goal will be to raise awareness so that bias and barriers can be overcome.

What is this?
This is the final 2014-2015 Workshop in which we will recap gender issues that are affecting women’s scientific careers and will hear from prominent and successful women in science.

Topics?
Topics to be discussed will include confidence differences in women and men, implicit biases held by both men and women, gender-expected behaviors & stereotypes, and bias in hiring & evaluation practices.

Next Meeting:
Tuesday, Apr 21 at 6pm in Shaffer 100. Pizza will be served.

RSVP: If you know you’ll make it, drop Karen a note for the pizza count and drink count.
